```
1   #include <cs50.h>
2   #include <stdio.h>
3
4   int main(void)
5   {
6       // Prompt the user for an integer and save it
7       float first = get_float("Number: ");
8
9       // Prompt the user for another integer and save it
10      float second = get_float("Another number: ");
11
12      // Divide these two numbers %0.2f prints us 2 decimal places
13      printf("%0.2f divided by %0.2f is %0.2f\n", first, second, first / second);
14  }
```
