```c
// Print a string's address as well as the address of its chars without the cs50 libaray

#include <stdio.h>

int main(void)
{
    char *s = "HI!";
    printf("%p\n", s);
    printf("%p\n", &s[0]);
    printf("%p\n", &s[1]);
    printf("%p\n", &s[2]);
    printf("%p\n", &s[3]);
}
```
